BOOK SYNOPSIS

Iraq + 100 poses a question to contemporary Iraqi writers: what might your home city look like in the year 2103 - exactly 100 years after the disastrous American and British-led invasion of Iraq? How might that war reach across a century of repair and rebirth, and affect the state of the country - its politics, its religion, its language, its culture - and how might Iraq have finally escaped its chaos, and found its own peace, a hundred years down the line? As well as being an exercise in escaping the politics of the present, this anthology is also an opportunity for a hotbed of contemporary Arabic writers to offer its own spin on science fiction and fantasy.
